

Full Data Gathering System from all MDBs, Generators, Boilers...

Company: Serum Products

Location: Choueifat

Country: Lebanon

REQUIREMENTS of the customer:

- Collect Data from Different Control Panels and Distribution Boards in order to know if any fault occurs in any area and solve the cause of the fault.
- The challenges were to design a rugged system with distributed IOs covering all site components. Data to be collected over profibus communication from Remote IOs and Power Meters.

BENEFIT of the customer:

- High availability of design and Architecture has been implemented using Siemens Software and Hardware: Simatic S7-300 PLCs on the Controllers level, Simatic WinCC for the SCADA Software offering a wide range of alarming, trending and reporting functions.
